<https://github.com/mikisupor96?tab=repositories>

Technically-minded, focused, and driven individual with hands-on experience developing websites by using a wide range of front- and back-end technologies i.e. React, JavaScript, Bootstrap, CSS, PHP, NodeJS, and Python. Adept at writing code that improved website accessibility, user experience, performance, scalability, and operational functionality. Proven success completing projects and directing diverse teams to solve multiple/complex issues, while meeting deadlines. Solid analytical, technical, and communication skills with the ability to work well in a team environment.

Front- & Back-End Web Development / Application Design & Roll-out / Problem Solving / Technical Troubleshooting / Code Debugging / Customer Satisfaction & Retention / Relationship Building / Team Leadership

## Technical Proficiencies

---

**Programming Languages:** JavaScript, CSS, PHP, Python, HTML, MySql

**Platforms / Software:** React, MongoDB, Express, NodeJS, Bootstrap, EjsMate, Ejs, Flash, Mongoose

## Freelance Web Development Projects

---

**Mapyo** - <https://github.com/mikisupor96/Mapyo>

Contribute efforts in developing an informational website that notifies the user about a country capital, weather, region, currency, population, general information and news. Assume accountability for adding live video feeds to appear on markers at locations within various cities. Utilise PHP routines to make requests to various API's i.e. Openweathermap, Wikipedia, Geonames, Restcountries, Newsapi.

**Company Database** - <https://cpdatabase.herokuapp.com/>

Designed and tested a system intended to be used by big companies to store and retrieve personnel information. Used languages like PHP, Javascript, HTML, CSS, MySql to achieve this.

**Thejulianwharehouse.co.uk** - <https://github.com/mikisupor96/thejulianwharehouse>

Currently designing a website - Thejulianwharehouse by using the skeleton of an Udemy course, enabling the owner to upload images for the public and the registered users to comment and rate the pictures. Utilise the full JavaScript Stack (JavaScript, Express, MongoDB, Node.js) to work on the project.

**Pig Game** - <http://piggame.surge.sh/> - HTML, CSS, JS

**Budgetty** - <http://budgetty.surge.sh/> - HTML, CSS, JS

**DoorGame** - <http://choosethedoor.surge.sh/> - HTML, CSS, JS

**Number Guesser** - <http://numberapp.surge.sh/> - HTML, CSS, JS

**Jamming** - <http://jammalingus.surge.sh/> - HTML, CSS, JS, React

**Ravenous** - <http://look4places.surge.sh/> - HTML, CSS, JS, React

## Professional Experience

---

**LEON, High Street Kensington  
Manager**

**01/2017 – 01/2018**

Assumed accountability to manage day-to-day front and back-house operations of the entire restaurant. Controlled stock level and orders supplies when needed. Ensured compliance with H&S regulations at all times. Improved customers' satisfaction level by resolving their complaints and queries.

- Leveraged superior leadership traits, whilst supervising a team of 8 highly talented individuals.
- Generated a profit of £1,000 in a single day by leading the team during rush hour and building positive customers' experience.

**Point A Hotel, Paddington  
Night Receptionist**

**01/2016 – 01/2017**

Performed various duties as part of a team of eight, which included greeting hotel guests, booking rooms, responding phone call, monitoring security, and maintaining a neat and clean environment. Performed other clerical receptionist duties such as filing, photocopying, and recording data. Arranged travel and accommodations as per the guests discretion.

- Streamlined hotel operations by revamping the statistical model in the report writing system.

Prior experience as a **Math Tutor** at Bsix, 2016 and 2017 / **Computer Technician** at Repair For You, March to May 2017
