CURRICULUM VITAE

I come from a background in customer service where I was able to develop my communication skills. However, I have always been interested in development and I am now looking to establish a career in the industry. This interest has led me to recently graduate from a coding Traineeship as a full stack developer including completing 2 real-world projects successfully to specification using a wide range of programming languages. I am a hardworking and loyal employee with excellent problem-solving skills and a drive to succeed. I am confident that I will make a valuable addition to your development team.

CODING TRAINEESHIP   **IT Career Switch Ltd**
Coding Traineeship – Full stack developer
1-year program

During the traineeship I had to demonstrate a very competent level of the following programming languages and technical skills

- HTML5, CSS3, JavaScript
- PHP, SQL, React, jQuery
- Java, Python, C#, Node.js
- Command Line Git, GitHub
- Remote API access

I have recently passed my **Microsoft 98-383: Introduction to Programming Using HTML and CSS**. More information on this certification can be found at: https://docs.microsoft.com/en-us/learn/certifications/exams/98-383

ADDITIONAL TECHNOLOGIES:

- MySQL, MongoDB, Express, Bootstrap, EjsMate, Ejs, Flash, Mongoose

DEVELOPMENT EXPERIENCE:
Below are the two briefs of development projects I completed with IT Career Switch which can be found in my bio:
https://mihaikodes.herokuapp.com

Portfolio Project #1: "Mapyo"
The specification was to reply to a website specification for a map-based app to provide information on countries – with a focus on a "mobile-first" development. Preferably using a framework, to then develop HTML, CSS and JavaScript with JQuery modules that use PHP server-based components to source data from third-party APIs (Geonames, OpenWeather). The solution is assessed on its delivery to specification, functionality, and usability.

Portfolio Project #2: "Company Database"
A more rigorous reply to this specification was required as a user requirements document was needed to be prepared which, when signed off, triggers the release of SQL allowing to develop a "mobile first" application to

maintain a company personnel database (MySQL). Sign-off is only achieved upon the student supplying an independently witnessed document providing confirmation of the system's ability to perform error-free.

CAREER HISTORY:

Sep 2020 – Nov 2021   **Full Time Studies**

Feb 2019 – Sep 2020   **The Alchemist**
